

My name is
Coronavirus
(but some people
call me COVID-19)

I am a cousin
of the flu
and common
colds

I have travelled all over the world

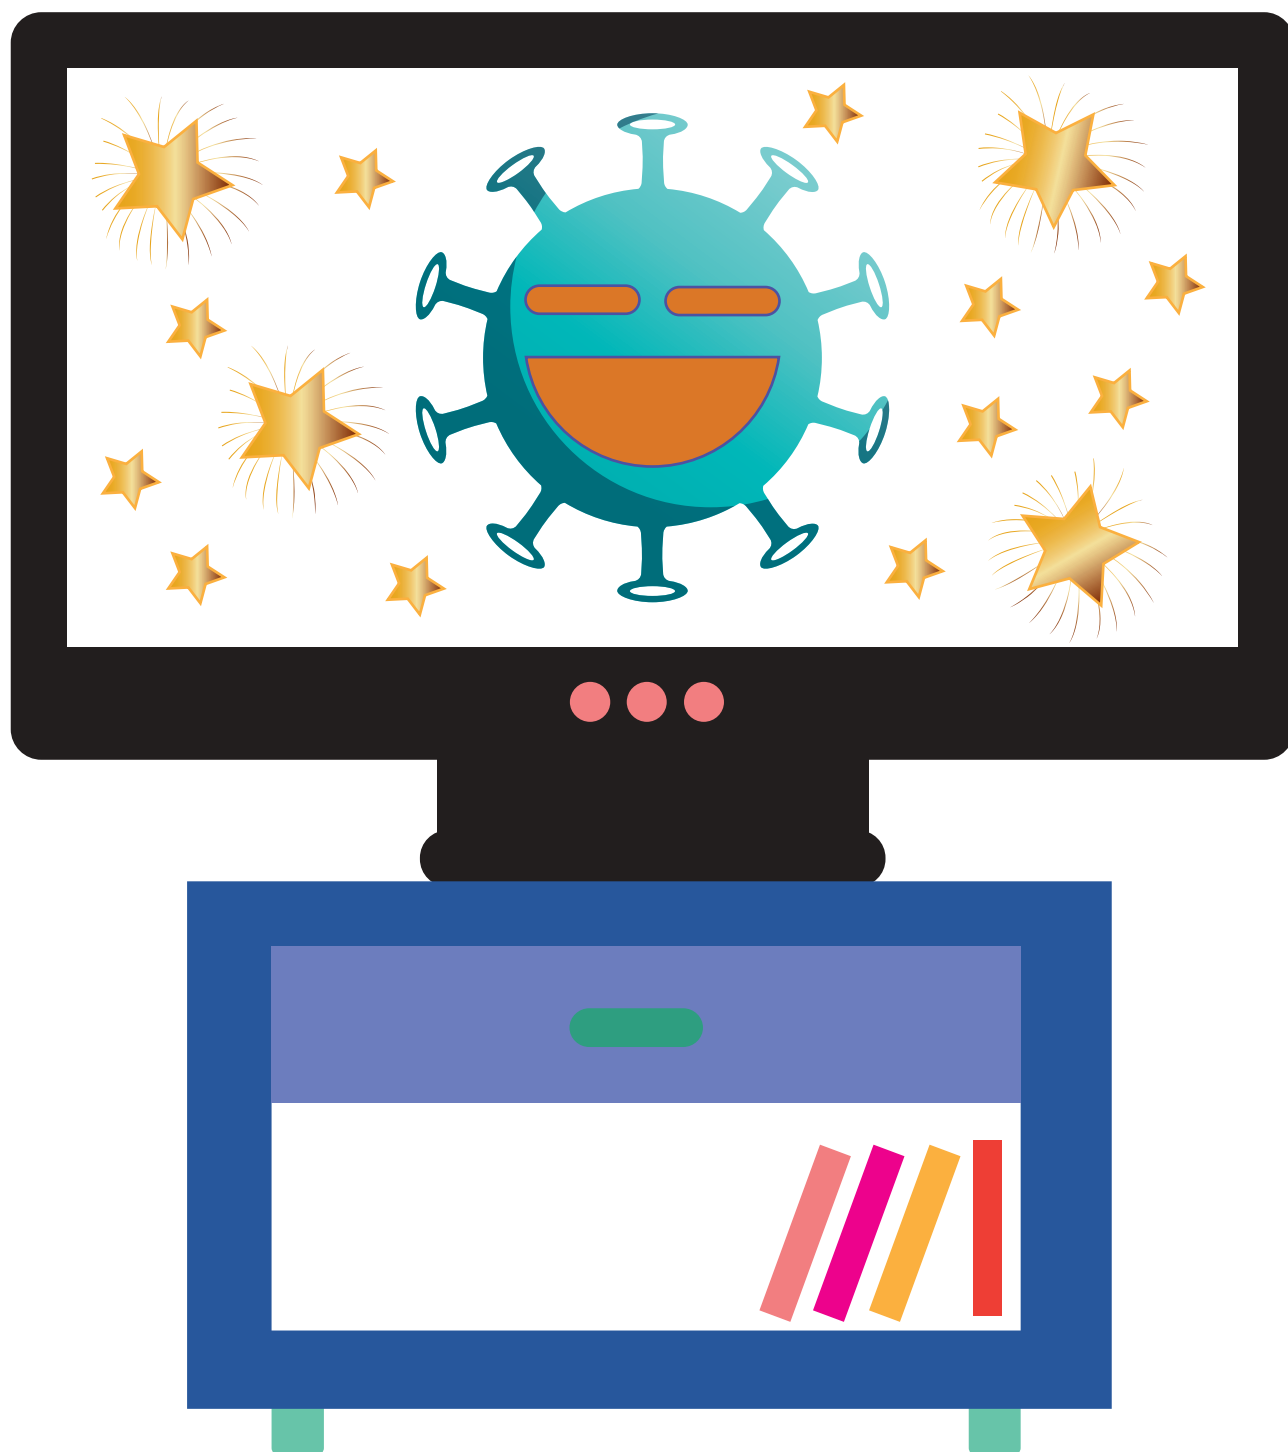

Jumping from hand to hand

When you hear my name,
how do you feel?

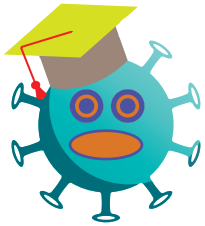

**Here is a space to draw
how you are feeling?**

**Adults sometimes get worried
or upset when they see me
all over the TV.**

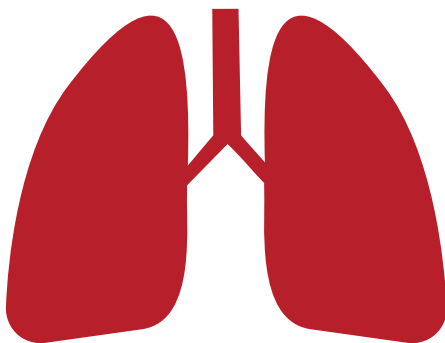

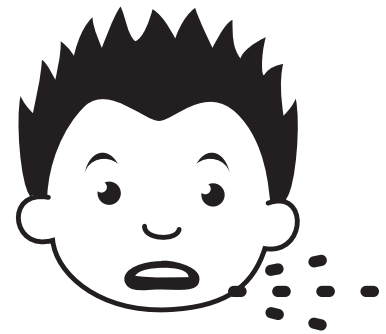

So here is a bit
more about me!

Like my cousins, I can cause...

fever

coughing

difficulty breathing

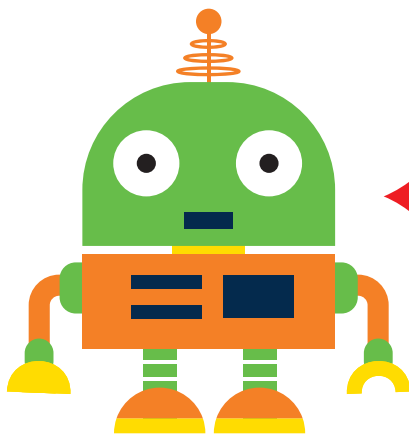

BUT
nearly everyone who
gets sick, gets better!

What can we do to stop Coronavirus spreading?

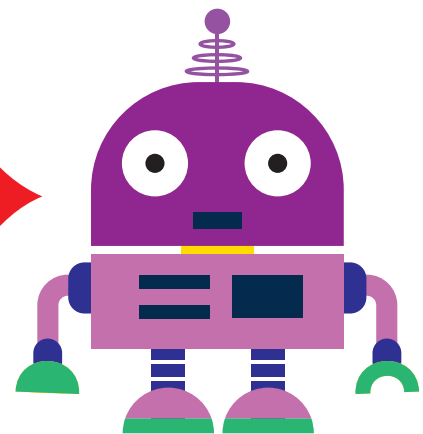

Wash your hands with soap while you sing Happy Birthday (or your favourite song)

Use hand sanitiser when you can

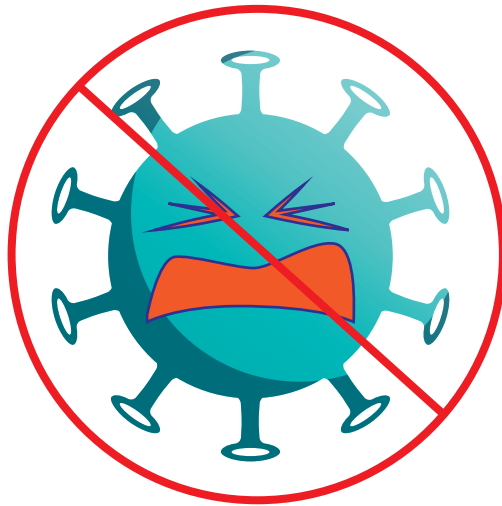

(two arms)

Stay apart from people when you are outside

If we all do this,
doctors will find a vaccine
and Coronavirus
won't be able
to travel anymore.

DON'T WORRY!!
The adults who look after you
will keep you safe!
